EX OFFICIO

E. M. FOSTER, *President* (1969–1970)
R. E. HUNGATE, *Vice-President* (1969–1970)

DONALD E. SHAY, *Secretary*
H. B. WOODRUFF, *Treasurer*

Correspondence relating to editorial matters should be addressed to the Editor, Prof. R. G. E. Murray, Department of Bacteriology, University of Western Ontario, London, 72, Ont., Canada.

Bacteriological Reviews, a publication of the American Society for Microbiology, 4715 Cordell Ave., Bethesda, Md. 20014, accepts reviews and monographs dealing with all aspects of microbiology. *Reviews* is published quarterly (March, June, September, and December), one volume per year. The subscription price is \$10 per year in the US and Postal Union countries, \$11 in other countries. Single issues are \$3 (\$3.25 outside the US). Members of ASM may receive *Reviews* as part of their dues. Correspondence relating to reprints, defective copies, availability of back issues, or lost or late proofs should be directed to the ASM Publications Office, 4715 Cordell Ave., Bethesda, Md. 20014. Correspondence from ASM

members relating to membership dues, member subscriptions, changes of address, incorrect address, incorrect journals, etc., should be directed to the American Society for Microbiology, 1913 I St., N.W., Washington, D.C. 20006. Nonmembers of the Society should write to The Williams & Wilkins Co., 428 E. Preston St., Baltimore, Md. 21202, regarding institution of nonmember subscriptions and nonreceipt of journals.

Second-class postage paid at Baltimore, Md., and at additional mailing offices.

Made in the United States of America.

INSTRUCTIONS TO AUTHORS

Bacteriological Reviews accepts reviews and monographs dealing with all aspects of microbiology. Authoritative and critical reviews of the current state of knowledge are preferred, although historical analyses will be accepted if the importance of the subject justifies this approach. Unevaluated compilations of the literature and annotated bibliographies do not fall within the scope of *Bacteriological Reviews*. Manuscripts of talks delivered at symposia and round tables are likewise unacceptable; however, their authors are encouraged to discuss with the Editor the possibility of using such material as the basis for preparation of a review, when publication in this form seems appropriate.

Monographs should embody the results of unusually extensive and well-rounded original investigations, the usefulness of which would be diminished by publication in the form of a series of separate papers. Past experience suggests that the monograph is particularly appropriate for the presentation of a definitive study on the biology of a microbial group.

Members of the Editorial Board will welcome any suggestions of topics and authors, either from prospective authors or from others. Prospective authors are advised to discuss with the Editor the suitability of their proposed contribution. The preparation of a synopsis or topical outline is desirable, since it often elicits constructive suggestions from editorial consultants. A review cannot, of course, be finally accepted until the finished product has been examined.

The editorial style of *Bacteriological Reviews* conforms to the *Style Manual for Biological Journals* (AIBS, Washington, D.C.; \$3.00). References should be listed alphabetically according to the last name of the senior author, numbered serially, and cited by number in the text. For example: 136. Salton, M. R. J. 1952. Cell wall of *Micrococcus lysodeikticus* as the substrate of lysozyme. *Nature* 170:746-747. Names of journals are abbreviated according to the *Biological Abstracts 1968 List of Serials with Title Abbreviations*. A table of contents showing the major headings and subheadings of the text is usually desirable; consult recent issues of *Bacteriological Reviews* for style. All abbreviations used (except those for standard units of measurement) should be defined parenthetically at first use in the text. Biochemical abbreviations should essentially follow the rules of the IUPAC-IUB (J. Biol. Chem. 241:527, 1966). Enzyme activity should be expressed in terms of international units (*Enzyme Nomenclature*, Elsevier Publishing Co., 1965), and the E. C. number should be given parenthetically at first use in the text. Genetics symbols introduced by the reviewer should essentially follow the recommendations of Demerec et al. (*Genetics* 54:61, 1966). As one of the requirements for description of a new species, we require deposition of the type culture in a recognized culture collection and designation of the accession number.

To expedite editorial review and preparation for the printers, the author should submit two copies of the manuscript, including illustrations. Original drawings should not be submitted; glossy prints are required, not larger than 8½ by 11 inches and preferably not smaller than 5 by 7 inches. When appropriate, magnification should be indicated by a suitable scale on the photograph. Each figure should be numbered and should include the name of the author, either in the margin or on the back (marked lightly with a soft pencil). All material should be double-spaced, including quotations, tables, legends for text figures, and references. This is essential to allow space for corrections and printer's instructions. Each reference cited should be checked with the original publication; titles and both first and last pages should be included. References to *Unpublished Data* and *Private Communication* should be kept to a minimum; if unavoidable, these citations should be made in the text only, not in the list of references. It is preferable to summarize supporting evidence whenever possible. When original data are presented, it is essential that the methods be fully described or that reference be made to previously published methods. It is the author's responsibility to obtain permission from the copyright owner to reproduce figures, tables, or quotations of more than 12 lines of text taken intact from previous publications, either his own or those of another author. Note that the journal or publisher (not the author) is the copyright owner; however, as a matter of courtesy the author's permission should be obtained as well. Each contributor will receive 500 gratis reprints of his contribution; additional reprints (in multiples of 100) may be purchased if desired. A table showing the cost of reprints, and an order form, will be sent with the proof. There are no page charges.
